PREMIUM HYGIENE-STATION

For safe hand hygiene and temperature measurement in one step

The Premium Hygiene Station with Premium sensor dispenser and temperature measuring device is ideal for entrance areas in museums, cinemas, leisure parks, stadiums, gymnasiums, schools, hotels, shopping centres, office buildings, banks, government halls, railway stations, airports, restaurants, medical practices, retirement and nursing homes, clinics, etc. It measures the temperature of people in real time, effectively helping to prevent the spread of viruses. If a person's temperature reaches 37.5°C (elevated temperature), this immediately triggers an acoustic signal, which indicates the risk of infection. The infrared thermometer works without any problems and does not need to be operated by anyone. With this hygiene station, which enables hand disinfection and simultaneous temperature measurement on the forehead, pandemics are effectively controlled and people's health is protected.

- instant and precise temperature display in red
- battery operated infrared thermometer with charging cable
- touch-free premium disinfectant dispenser with sensor function (1000 ml)
- maximum hygiene through contactless access to the disinfectant
- refillable plastic container, max. filling capacity 1000 ml
- fill level is clearly visible from outside
- 2 spray levels: 0.3 ml or 0.6 ml per application
- premium sensor dispenser: battery operation with 8 x AA (Batteries not included)
- quick and easy to set up, with lockable front
- robust and tilt resistant

DISPENSER SYSTEMS

PREMIUM METAL-STAND WITH SENSOR DISPENSER

For safe hand hygiene in passing by

In order to keep hands sterile and protect people from infections, ARCORA® PREMIUM METAL STAND with PREMIUM SENSOR DISPENSER is just the right thing - contact-free, fast and reliable. Its simple design makes it suitable not only for health care facilities, medical rooms and offices, but also for reception areas of shops, fitness studios, hotels and restaurants. The sensor-controlled dispenser enables contactless dispensing of disinfectant, thus preventing direct contact with the dispenser. It enables an exactly dosed hand disinfection with liquid disinfectant. The integrated empty bottle has a filling volume of 1000 ml and enables at least 1500 uses by dispensing 0,3 ml or 0,6 ml per application without having to refill. The lockable front prevents theft or manipulation of the disinfectant. The PREMIUM METAL DISPENSER is equipped with a stable base element and a drip protection prevents contamination on the floor. The dispenser can be placed anywhere.

- non-contact disinfectant dispenser with sensor function (1000 ml)
- maximum hygiene through contactless removal of disinfectant
- refillable plastic container, max. filling capacity 1000 ml
- fill level is clearly visible from outside
- 2 spray levels: 0.3 ml or 0.6 ml per application
- quick and easy to set up, with lockable front
- battery operation with 8 x AA (batteries not included in delivery)
- material/colour housing: ABS plastic, black/white
- material stand: Black, coated steel
- weight: 9.2 kg (complete with stand and dispenser)
- sensor dispenser also available without stand

ARCORA® GROUP

PROTECTIVE MASKS

MASKS

SILVER ION TECHNOLOGY MASK SF30

Comfortable mouth-nose covering with integrated silver ions

Every day we are surrounded by microorganisms and some of them can lead to serious diseases. ARCORA® silver ion masks protect against bacteria, germs, viruses and pollen, which are rendered harmless before each inhalation and with each exhalation. Within a short time (max. 1 hour), up to 99.9 percent of germs are eliminated. Silver Nano technology prevents the survival and reproduction of bacteria, due to the germicidal characteristics of silver. The masks are especially suitable for asthmatics, allergy sufferers and people with weakened immune systems.

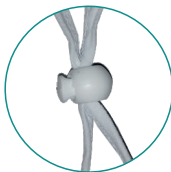

Silver ion masks consist of 4 protective layers and are effective against microorganisms for 30 days without washing. **After 30 days, the masks can be washed at 30-40°C and used again for the next 30 days.**

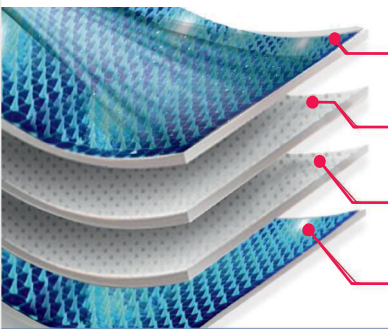

article-no.	units
01333	1 pcs

Antimicrobial nanosilver:
The particles, which are less than 100 nm in size, emit silver ions that prevent the growth of bacteria, viruses, etc. by inhibiting their metabolism. On the one hand, the nanosilver can attach to the outside of the cell and damage it, and on the other hand, it can penetrate into the cell. Inside the cell, they work like a depot from which silver ions are continuously released over a longer period of time.

- very high wearing comfort: Adjustable ear loops and extra soft fabric
- high breathability
- reusable several times, as washable
- 4-layer weave technology
- **30 days full protection without washing**
- nanoparticle technology
- filter performance 99.9 percent
- **individually packaged in resealable protective aluminum foil**
- material is treated with approved biocidal products

Adjustable ear loops thanks to cord stopper

1st layer: 30 g/m² nonwoven antimicrobial molecular protective barrier

2nd layer: 25 g/m² meltblown protective barrier

3rd layer: 25 g/m² melt blown protective barrier.

4th layer: 20 g/m² nonwoven antimicrobial molecular protective barrier

Spacer for easier breathing

The silicone spacer ensures that the mask no longer rests directly on the mouth. In addition to better breathing, the spacer also provides protection for make-up. Suitable for all types of masks.

AVAILABLE ON REQUEST ONLY!!!

MASKS | FACE SHIELD

DISPOSABLE MASKS

With integrated metal clip, which adapts to the shape of the nose.

The breathable disposable masks 3-layer protect against droplets, dust, pollen etc. With elastic bands to fix behind the ear.

X-LINE WIPES

MOIST WIPING SYSTEMS

X-LINE POCKET WIPES

DISPOSABLE WET WIPES FOR HAND DISINFECTION

**Reliable hand disinfection
on the move!**

Article-no.	Units	Weight Boxes
01315	1000 pcs	7,5 kg

With pleasant fragrance

12 cm

The X-LINE disposable wet wipes are practical, ready to use and can be used anywhere and anytime for hand disinfection. Especially in places where water and soap are not available, for example when shopping, at the cash dispenser, in public transport, in restaurants and hotels etc. The X-LINE disposable wet wipes have an effective, absorbing and cleaning texture (honeycomb texture) and are very hygienic due to the single use. As the product solution is based on 70% ethyl alcohol, it has the capacity to kill viruses and bacteria.

Due to additional substances such as essential oil, the product has a skin-caring, protective and cleansing effect.

- ideal for on the road due to handy size
- with 70% ethyl alcohol (effective against viruses and bacteria)
- weight: 45 g/m², honeycomb texture
- ready-to-use
- minimum shelf life: 2 years

The individually packed X-LINE wipes are also ideal for distribution in restaurants, take-away stores, gas station, bakeries and for guests in hotel rooms.

Sheet size 20x16 cm →

**Gladly we can produce the X-LINE POCKET WIPES with
your logo and design for orders from 10.000 pcs.**

**Give viruses and bacteria
no chance!**

Safety data sheet available on request!

X-LINE WIPES MOISTENING SYSTEM

WET WIPE DISPENSER INCLUDING CLOTH ROLL AS SET

**With absorbent, tear-resistant
and lint-free cloth roll**

The X-LINE WIPES MOISTURIZING SYSTEM is a refillable dispensing system for soaking wipes with disinfectants or cleaning agents.

Ideal for rapid and easy disinfection or cleaning wipe-resistant surfaces in medical facilities, schools, kindergartens, retirement homes, fitness centers, as well as in food processing, industrial and public facilities. Especially for areas that need to be disinfected or cleaned several times a day. Also ideally suited for hand disinfection.

The resealable dispenser bucket can be used universally and allows safe and easy removal. The closed system protects the liquid from contamination and evaporation.

- for all wipe-resistant surfaces
- easy handling
- universally applicable
- refillable system
- safe and user-friendly system
- economical use of wipes and application solution
- durability after impregnation - 28 days

dispenser size	article-no.	units
19,5x19,5x22 cm	01109	4 sets

Included in delivery with article no. 01109:

1 wet wipe dispenser volume 5 litres

1 white cover and 1 cloth roll with 350 sheets

PREPARATION

1. Put on gloves to protect the cloth roll from contamination.
2. Remove the cloth roll with gloves from its package.
3. Place the cloth roll in and pull out the first cloth.
4. Dose approx. 2.5-3 litres of ready-to-use application liquid in the desired concentration or use ready-to-use surface disinfectant.
It is recommended to use distilled or demineralized water for dilution to prevent streaks on the surface.
5. Fill in disinfectant solution in the desired application concentration.
6. Insert the first cloth through the cover opening and close the dispenser with the cover
Then wait 30-60 minutes so that the wipes can be soaked.
7. Mark the security label and stick it on to note the expiry date.
8. The wipes can be used for 28 days after soaking.

APPLICATION

Wipe objects and surfaces carefully until completely wetted.

Pay attention to the disinfectant's exposure time and concentration.

REFILLING

1. Put on gloves to protect the cloth roll from contamination.
2. Before refilling, dispose cloth and liquid residues.
3. Clean new or empty dispenser with alcoholic detergent.
4. Disinfect the dispenser with a cloth soaked in disinfectant for 1 minute.
5. Allow all parts to dry thoroughly and refill..

X-LINE SPARE DISPENSER BOX & CLOTH ROLL

SPARE DISPENSER BOX

The dispenser box made of robust plastic is ideal for impregnating wipes with disinfectant or detergent. With a tightly closable cover, which ensures an all-round airtight seal. Very suitable as a refillable dispenser system.

- with carrying handle for easy, fast and comfortable transport
- separately closable removal opening integrated in the cover
- wipes do not dry out
- hygienic extraction

dispenser size	article-no.	units
19,5x19,5x22 cm	01117	1 pcs

Included in the scope of delivery with article no. 01117 :

AIRLAID-DISPOSABLE TOWELS

AIRLAID-DISPOSABLE TOWELS

Absorbent Airlaid disposable towels for single use made of environmentally friendly cellulose airlaid non-woven fabric from ARCORA.

It doesn't matter if it's for washing hair, drying hands or face, the use of towel is a regular routine. In hairdressing or beauty salons, a large quantity of dirty and used towels comes together daily. In addition, classic towels are a collection point for bacteria and germs.

Enough of this now!

The lint-free Airlaid disposable towels, which can be easily disposed are ideal for use in salons, hotels or fitness centres and thus replace conventional towels. An enormous absorbency, **400 times** its own weight, characterizes the antibacterial and hygienic Airlaid disposable towels.

- Hygienic protection against germs and bacteria
- Comfort and a safe feeling with the customer
- High absorbency
- Lint-free and efficient
- Soft and smooth
- Distinguishes itself from similar products by its weight (**55 g**)
- Material: 60 % cellulose, 30 % cotton, 10 % tree resin

INFRARED HEAT TABLE

SPECIAL PRODUCTS

INFRARED HEATING TABLES - ENJOY COOL EVENINGS OUTDOORS

For a cozy atmosphere despite low temperatures

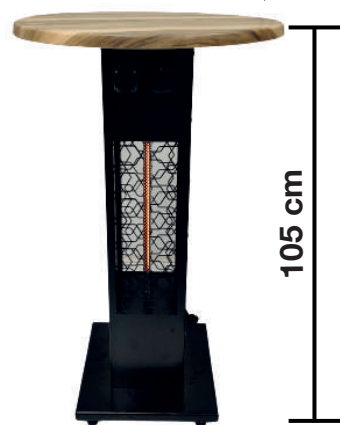

With ARCORA® infrared heating tables, there is no need to miss out on spending time outdoors on cooler days. By placing the infrared heater in the table leg, the heat rises upwards and is beneficial for the whole body. Despite freezing temperatures, these heating tables produce an even heat instantly at the touch of a button, creating a cozy and comforting atmosphere in your outdoor space. The table leg always remains cool despite the heater and thus does not pose a risk of burns.

Due to corrosion-resistant material, it is possible to leave the tables outdoors.

The table surfaces can also withstand high demands such as sun, rain, ash or grease.

As a modern stainless steel table with wooden table surfaces, the tables appear trendy unlike traditional tables and add a beautiful modern look to the environment.

Infrared produces a quick and pleasant warmth. The infrared radiation hits surfaces, is absorbed and then converted into pleasant warmth that can be felt immediately. This warms not only the feet and thighs, but also the upper body. The infrared light waves are sent several meters away. Therefore, the heat is still perceptible several meters away from the table.

Heat control via 2 stages

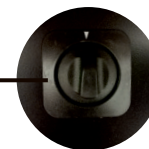

Table surface colour

- immediate heat generation after switching on
- soothing warmth
- no dust whirling up
- noise-free and odorless
- easy to install
- energy-saving
