

## ANTI-FOAM

### ANTI-FOAM DEFOAMER

#### PROPERTIES

Cold and hot water resistant anti-foam concentrate for the prevention of excessive foam formation in scrubber driers, water vacuums and spray extraction equipment. With the help of ANTI-FOAM, foam formation in dirty water tanks is reduced or prevented. Collapses the foam and at the same time prevents new foam formation. For use in mechanical cleaning methods.

- Reduction and prevention of foam formation
- For the disintegration and prevention of foaming
- Economical in consumption
- Acts spontaneously

#### APPLICATION AREAS

For defoaming the dirt liquor in dirty water tanks of water vacuums, scrubber driers and spray extraction units. Suitable for all types of equipment.

#### APPLICATION

Shake bottle before use. Add a few squirts to the suction hose with the suction motor switched on. For large scrubber driers, add 100 - 200 ml diluted with 1 - 2 liters of water to the dirty water tank, depending on the volume of the dirty water tank. After emptying the dirty water tank, repeat the process. Do not mix with other cleaning agent concentrates or cleaning products pure.

Color changes or differences in the product have no influence on the quality.

**Attention! Protect from frost.**

**REGULATION (EC) No. 1272/2008:** The mixture is not classified as hazardous according to Regulation (EC) No 1272/2008.
