# LIMESCALE REMOVER

# **CLEATOR**

# LIME REMOVER FOR COMMERCIAL MACHINES

## **PROPERTIES**

Acidic, liquid limescale remover, removes limescale deposits, water stains and other deposits on the inside surfaces of machines. For hot water appliances, dishwashers, coffee machines, washing machines and similar appliances.

#### **APPLICATION AREAS**

For hot water appliances, dishwashers, coffee machines, washing machines and similar appliances.

## **APPLICATION**

Depending on the limescale, apply undiluted or add  $5\,\%$  of the water filling. Rinse the units clean and fill with fresh water. Add CLEATOR according to the dosage instructions and rinse or circulate. Repeat the process if there is a lot of limescale. Then rinse thoroughly. Please note: Despite corrosion inhibition of the CLEATOR, the residues remaining on the metallic surfaces can cause corrosion if left for a longer period of time. Coffee machines may only be descaled when the container is open. Heating up accelerates the effect. After this process (duration approx. 1 hour), rinse several times with fresh water.

Recommended: Add undiluted or 5% of the water filling.

## **INGREDIENTS**

Organic acids

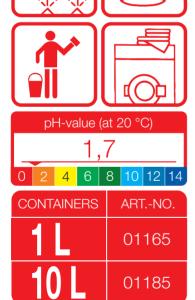

# Warning!

Contains citric acid monohydrate E330 I-ware. Causes skin irritation.

Causes severe eye irritation.

- Wear protective gloves / protective clothing / eye protection / face protection.
- IF IN EYES: Rinse cautiously with water for several minutes. Rinse cautiously with water for several minutes. Remove existing contact lenses if possible. Continue rinsing.
