

STONE CLEAN PAS - ALKALI

DEEP CLEANER FOR CALCAREOUS STONE

FEATURES

STONE CLEAN PAS - ALKALI dissolves inorganic and organic deposits. For cleaning extremely dirty surfaces. The paste can be diluted until it can be brushed and is therefore also suitable for use on extremely dirty surfaces such as tile coverings in slaughterhouses, etc.

APPLICATION AREA

Suitable for cleaning calcium-containing stone such as marble, terrazzo, travertine, sandstone, shell limestone, etc. as well as cementitious stones such as concrete, exposed aggregate concrete, etc. The paste also removes a number of paints and wood preservatives.

APPLICATION

- The cleaner is always used pure on dry surfaces with a nylon tassel.
- If the paste is diluted with water, the degree of dilution must be adapted to the desired cleaning effect.
- The exposure time is between 30 min - 12 hours (depending on the soiling level).
- The reactivity is bound to the presence of water. The dried product can no longer be effective, but it cannot damage it. Drying should be prevented as far as possible, water can be used to dissolve the product again.
- After the reaction time has passed, the paste should be thoroughly rinsed off with a high-pressure or hot water device (until the washing water no longer foams!).
- Neutralisation is not required for smooth surfaces and rock with low absorbency.
- For very absorbent and fissured stones, it is recommended to rinse with STONE CLEAN LIQ - ACID diluted in a ratio of 1:10.

Recommended: Eine Imprägnierung nach Abtrocknen der Steinoberfläche.

SUBSTANCES

Potassium hydroxide, alcohol C9-11, ethoxylated, sodium hydroxide.

NOTE ON WASTE DISPOSAL

Transfer the goods into a suitable container and arrange for disposal by a specialised disposal company. Contaminated packaging can be disposed with normal industrial waste. In addition, pay attention to the applicable local disposal regulations.

Danger!

Causes severe skin burns and eye damage.

- Wash hands thoroughly after use.
- Wear protective gloves/protective clothing/eye protection/face protection.
- IN CASE OF CONTACT WITH SKIN (or hair): Remove all contaminated clothing immediately. Wash skin with water/shower. Wash contaminated clothing before wearing again.
- IF IN EYE CONTACT: Rinse gently with water for several minutes. If possible, remove any contact lenses. Continue rinsing. Call the POISON INFORMATION CENTER/physician immediately.
- Keep under lock and key.
- Dispose of this product and its container at hazardous waste collection.

- Always read labelling and product information before use.
- For commercial/industrial use only!
- Reusable containers
