

FOAM-SPRAY-SUCTION-MACHINE

aniko®30 FOAMTEC

SPRAY SUCTION MACHINE WITH FOAM TECHNOLOGY

PROPERTIES

ANIKO30 FOAMTEC is a small spray-suction machine with foam technology for professional use on walls, ceilings and other surfaces that need to be cleaned with the help of foam. Despite its small dimensions, it is suitable for professional use and intensive use. The sprayed foam adheres to the surface and allows a long exposure time and a more intensive cleaning power. The advantages of foam technology include time and detergent savings as well as the visual effect during cleaning.

Further properties

- handy size, easy to use
- robust construction, tank made of polyethylene with high tightness
- ideal for professional cleaning work of very dirty Sanitary areas, canteen kitchens, etc.
- regulated dosage of the cleaning agent
- easy adjustment from foam phase to rinse phase
- Canister with detergent can be cleaned thanks to the integrated The holding device can be perfectly placed on the machine

APPLICATION AREA

Suitable for use in rest houses, discotheques, bars, canteen kitchens, factories, medical institutions, hospitals, fitness studios, sports halls, schools, universities, swimming pools, spa areas as well as in public toilets, showers, etc.

TECHNICAL DATA

Dimensions	38x70x86 cm
Packing dimensions	54x90x115 cm
Machine weight	50 kg
Weight incl. packaging	77 kg
Suction motor / max. air output	zweistufig / 50 l/sec
Max. Power	1000 W
Water column	2200 mmH ₂ O
Power Pump with By-Pass	90 W, 9,0 bar, 5 l/min
Fresh water tank	14 Liter
Dirty water tank	14 Liter
Number of nozzles	1
Cable length	10 m
Length of hose	5,5 m
Area output	25 m²/h
Compressor	350 W
