

SPRAY EXTRACTION DEVICE WITH BRUSH

aniko®70 BRUSH

SPRAY EXTRACTION APPARATUS WITH ROTATING BRUSH

PROPERTIES

ANIKO70 is a spray extraction and brushing machine for the professional Cleaning of medium and large carpet and hard floor surfaces. Thanks to the working width of 40 cm, large areas can be cleaned quickly and effectively. Automatically adjustable pressure of the rotating brush enables the basic cleaning of heavily soiled Carpet and hard floors.

Further properties

- High suction power thanks to three-stage motor
- Fast conversion from carpet to hard floor cleaning
- comfortable working height
- low-noise, as only 60 decibels are required
- robust construction, tank made of polyethylene with high tightness
- simple use
- Ideal for professional cleaning work in the building cleaning industry
- adjustable water volume
- Suction motor with thermal protection against overloading

APPLICATION AREA

Suitable for use in cleaning companies, hotels, restaurants, pubs, bars, offices, banks, carpet shops, airports, shopping centres, ships, hospitals, medical institutions as well as in public facilities such as sports halls, schools, universities, etc.
