

PROFI MELAMIN POWER-CLEAN

STAIN REMOVER SPONGE

PROPERTIES

Melamine resin foam works in a similar way to an eraser. Extremely sharp-edged special resin particles in ARPAD MELAMIN dirt removers break up the dirt, supported by rubbing motion, and absorb it. This means that even the finest and most stubborn dirt can be removed from the pores. The ARPAD MELAMIN dirt remover consists of 100 % original melamine resin foam type Basotect® V31012 white from BASF.

APPLICATION

For quick and easy stain removal.

APPLICATION AREAS

In the house: Plastic and aluminium, window sills, glass surfaces, mirrors, greyed/yellowed plastics, dirty streaks and stains on PVC, linoleum and fine stone floors, light switches, garden furniture, tiles in kitchens and bathrooms, tarnished metals and shoe marks

In the office: Printing and stamping ink, permanent marker (Edding), pencil, yellowing of tables/chairs/cabinets and plastic surfaces of electrical enclosures, desk tops, metals, leather covers, radiators, blinds, shutters, sports shoes, ballpoint pens

In the kitchen: Plastic, enamel, silver, chrome, aluminium, ceramics, glass ceramic hobs, stubborn tea and coffee stains, cooker bonnets and stainless steel surfaces

In the car: Nicotine traces and tea stains on plastic trim, plastic parts in the interior, sticky dirt, cleaning of trims, hubcaps, brake dust from unpainted aluminium rims
