

CLEANING SPONGE

LOGLIFE SPONGE

SPONGE METHOD

THE NEW SPONGE GENERATION

PROPERTIES

LOGLIFE SPONGE - the new generation of cleaning sponge.

The sponge with 2 practical sides: the effective sponge wiping side with grip groove and the robust, long-lasting abrasive scouring fleece side which removes even the most stubborn dirt and incrustations from insensitive surfaces. The patented surface of the fleece is 5 times longer durable than the ARPAD abrasive fleece side thanks to the laser embossing and the rhombic compacted surface.

Further properties:

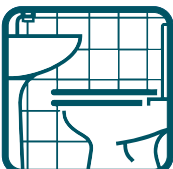

- Universally applicable on impervious surfaces
- Optimal size for ergonomic support and fatigue-free working
- Comfortable and secure grip thanks to the ergonomic shape than conventional ARPAD sponges
- Protection of fingernails thanks to the lateral profile of the LOGLIFE SPONGE
- Excellent price-performance ratio

APPLICATION AREA

For damp and wet cleaning of insensitive surfaces such as pots, pans, cast iron pans, roasting trays, metal containers and tiles. Particularly suitable for use in HoReCa facilities such as hotels, restaurants, pubs, catering and party services, office buildings, airports, shopping centres and clinics.

APPLICATION

Use the fleece side for damp and wet cleaning of all insensitive surfaces.

Small Sponge

Art.-No.: LLS15070GEG
Size: 150x70x45 mm
Weight: approx. 15 g / Sponge

Colour: YELLOW-GREEN

Unit: **10x10** pcs.

Big Sponge

Art.-No.: LLS15070GEG
Size: 160x110x25 mm
Weight: approx. 19 g / Sponge

Colour: YELLOW-GREEN

Unit: **15x4** pcs.
