The bags' material is made of 100% woven polyester and reinforced with a sponge insert to help the holder slide.

### PROPERTIES

Thanks to its fiber, the **microfiber loop cover** has an electrostatic effect and is therefore ideal for dust-binding dry cleaning. Due to its good cleaning results, the use of chemicals can be reduced. At the same time, the dirt and water absorption are optimal. Thanks to the closed outer fringes made of polyester microfiber, hygienic cleaning is achieved.

- Optimal dirt and water absorption due to loops made of polyester microfiber
- High water absorption and water depot effect
- High quality plush microfiber
- Tear-resistant and water-permeable polyester pockets
- Long life due to high quality manufacturing process

### APPLICATION

Applicable both dry and wet on smooth, coated and uncoated floor coverings.

### APPLICATION AREA

For maintenance cleaning, basic cleaning as well as wet and dry cleaning of any surfaces, such as elastic coverings, hard coverings, porcelain stoneware, stone floors, tiles, laminate floors and ideally suited for smooth and porous floor coverings. Particularly suitable for use in industry, production, health care, clinics, retirement and nursing homes as well as public facilities and building cleaning.
