MADE IN EEC

PROPERTIES

Can be used on all surfaces. Due to the static charge and the capillary action, the cloth absorbs even the smallest particles. The cleaning results are remarkable and absolutely lint-free. The microfiber cloth has an above-average service life and absorbs a maximum force of dirt and water.

- Double stitched edge protection and additional quality binding tape
- Maximum absorption power of dirt and water
- Above average service life
- Cost and time savings compared to commercially available cleaning cloths

APPLICATION

Applicable both dry and wet.

AREA OF APPLICATION

For maintenance cleaning of any surfaces. Especially suitable for use in public facilities, hotels, restaurants and catering establishments.

WASHING RECOMMENDATION

Recommended washing temperature is 60 °C. A maximum washing temperature of 95 °C should not be exceeded. The use of fabric softeners and bleaching agents should be avoided. In general, it is recommended to wash only single types.

Do not use fabric softener & bleach
Wash according to type
