

CLEAN AND DISINFECT IN ONE STEP

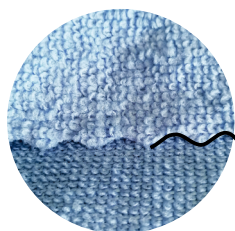

MADE IN EEC

SPECIFICATIONS

yarn blend:	80% Polyester 20% Polyamid
colour:	BLUE, GREEN, YELLOW, PINK, WHITE, GREY
shrinkage value:	3-4 %
size:	30x30 cm
weight:	ca. 14 g/Cloth
units:	30 x 20 = 600 pieces
item-no.:	AEL3030BL ● AEL3030GR ● AEL3030GE ● AEL3030RO ● AEL3030WE ● AEL3030GU ●

**Cost-effective &
optimal alternative
to disposable cloths**

WAVE-CUT
Dimensionally stable & longer life
durability compared to classic
edges due to modern
hot cut technology

The ECO-LINE 2IN1 microfiber cloth is the perfect cloth for an extensive and successful disinfection cleaning in general areas especially in health care sectors. The low grammage with high-quality of recycled yarns and special laser-cut technology enables perfect results with up to 60-100 laundries with one cloth.

- **2IN1: Clean and disinfect in one**
- **Clean, streak-free surfaces thanks to the yarn blend**
- **Ensures the required exposure time**
- **Optimal cross-linking of disinfectants on the surfaces**
- **Alternative to disposable wipes, as they can be reused several times**
- **Unbeatable price-performance ratio**
- **Ideal for disinfecting medical equipment**
- **Lint-free & stable in shape**

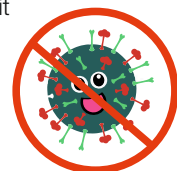

Specially designed for surface disinfection
Can also be used for general cleaning

What makes it special?

There are many problems in the disinfection processes. Which happens mostly by disregarding the exposure time of the disinfectants on the surfaces. The ECO-LINE 2IN1 microfiber cloth ensures perfect disinfection results with compliance of the **required exposure time and optimal cross-linking**. The low grammage with high-quality of recycled yarns and special laser-cut technology enables perfect results. A unique product innovation with a very attractive price, which makes it very interesting for the customer.

The cloth enables the user to avoid any mistakes in the disinfection process and make sure that the disinfection is done by the right way. The **perfect grammage** ensures the required exposure time on surfaces. Thanks to the **weaving procedure** the cloth only absorbs **70 % of the the disinfectants and leaves 30 % of the disinfectants on the surfaces**. The 30 % damp residues ensures that the disinfectants can work on the surfaces and **eliminate the bacterias within 30-60 seconds** without leaving any stripes. For the user there is not any instructions needed which means that the user can directly work on surfaces without taking care of any exposure time. This makes the user more comfortable in this progress, saves a lot of working time, easy to use without any special instructions and ensures the required disinfection impact. And the cloth is also washable and reusable.

Do not use fabric softener & bleach
Wash according to type

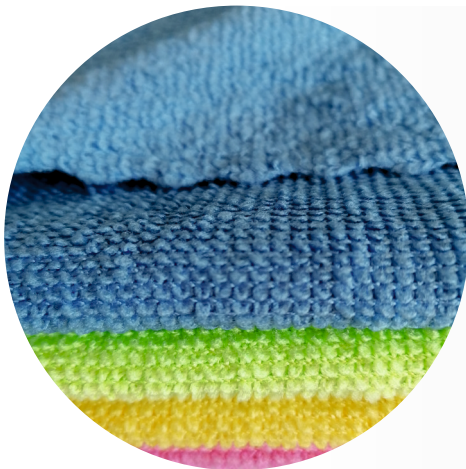

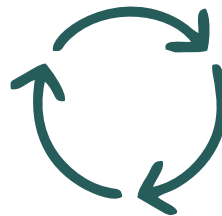

Application / Application area

The cloth can be used dry with disinfectants, for preparation as well as dry and wet cleaning on surfaces. For cleaning and disinfecting any surfaces. Particularly suitable for use in the health care sector, clinics, doctors, surgeries as well as nursing homes.

Environmentally friendly

The economical, washable ECO-LINE 2IN1 cloth is the optimal alternative to disposable wipes which can be used for cleaning as well as for disinfecting surfaces. Depending on the washing & drying process, up to 60-100 washes are possible with the ECO-LINE 2IN1 cloth. Fleece wipes can usually only be used for less laundries and disposable wipes with one use. Those achieve ecologically and economically a significantly worse result due to disposal. In addition, the ECO-LINE 2IN1 cloth is made of recycled yarns.

1. Disinfection cloth guarantees the right process with the required exposure time.
2. For the user there is not any instructions needed which means that the user can directly work on surfaces without taking care of any exposure time.
3. Reusable cloth with up to 60-100 laundries with one cloth.
4. Innovation product for very affordable economic price.
5. Environmentally friendly, made of recycled yarns.
6. Secures that the end user avoid any mistakes in this process.
7. Saving a lot of costs and working time
8. Very end-user friendly
9. The cloth can also be used for general cleaning
10. Due to the light weight of the cloth there are cost savings in the laundry process.
