IDEAL SOLUTION FOR DAILY MAINTENANCE CLEANING!

In daily maintenance cleaning, especially in the international market, there are often problems with limited cleaning education and language barriers. Therefore, it is important to find a solution to avoid possible mistakes during maintenance cleaning. The solution is called ARCORA® PU-PAD

- Composition of polyester, polyether and a fixation of polyurethane → **special robustness and durability**
- Very high area performance, up to 50.000 m² → **less pads have to be used, reduction of set-up times for machines**
- Use of recycled products → **100 % environmentally friendly**
- Applicable on all water resistant hard and elastic floor coverings, for all cleaning machines → **diverse range of application, one pad to replace all others**
- Higher water absorption than conventional pads → **less water and cleaning chemicals are needed**

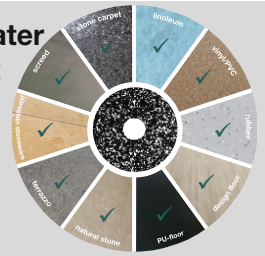

> 50.000 m²

environmentally friendly

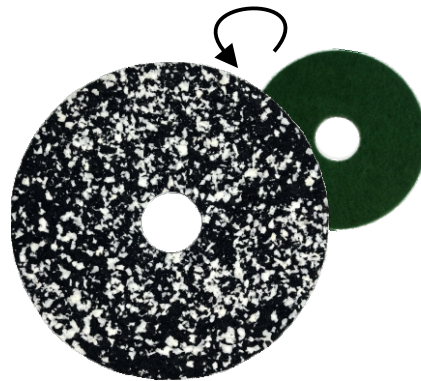

for all water resistant floors

Furthermore...

- Two-sided application possible
- Climate neutral product
- Excellent value for money

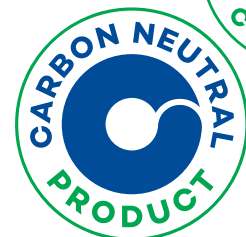

100 % environmentally friendly

The ARCORA® PU-PAD is 100% environmentally friendly, due to the use of recycled products. Furthermore, the pad is certified as climate neutral product. The produced CO₂ amount is compensated by international climate protection projects which support the decrease of global warming.

ARCORA® supports the following UN-climate goals with the PU-PAD:

- Clean water and sanitation
- Affordable and clean energy
- Decent work and economic growth
- Climate protection measures

ARCORA® PU-PAD

innovative development extension of conventional pads

APPLICATION RANGE OF ARCORA® PU-PAD

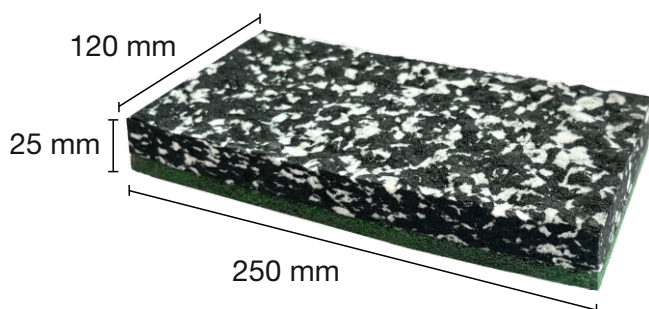

The ARCORA® PU-PAD is used for the maintenance cleaning of any water resistant hard floor and elastic floor coverings such as tiles, stone floors, porcelain stoneware, concrete floors, vinyl floors, PVC and linoleum. It is especially suitable for the use in public facilities, airports, shopping malls, hotels, restaurants and office buildings. Use the pad side for cleaning all hard and elastic floor surfaces. For more stubborn dirt, the pad backside (green) can be used as a normal cleaning pad.

For cleaning corners and smaller areas the PU-HANDPAD is perfect.

The PU-SPONGE is ideal for use in the kitchen area. For damp and wet cleaning of sensitive surfaces such as pots, pans, cast iron pans, roasting trays, metal containers and even tiles. Particularly suitable for use in HoReCa facilities such as hotels, restaurants, pubs, catering and party services, office buildings, airports, shopping centres and clinics. Use the pad side to remove stubborn dirt and the sponge wipe side to absorb water and dirt.

ARCORA® PU-PAD ALL-ROUND APPLICABLE

For all water resistant hard and elastic floor coverings

- Zero risk damage:
Only one pad for all water-resistant floor coverings.
- Training of employees on different covering types is no longer needed
- Set-up times can be reduced because the pad need not to be changed on the different floor types.

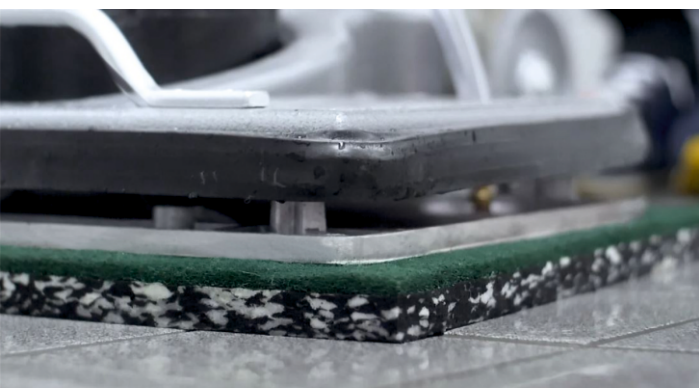

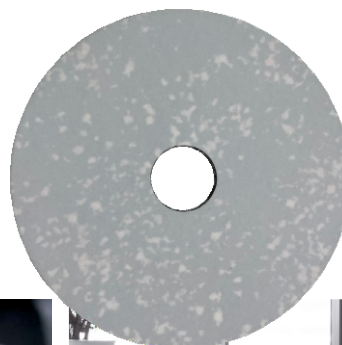

Suitable for all single-disc, scrubber-dryers and for orbital and eccentric machines.

The ARCORA® PU-PAD is also suited for cleaning machines with orbital technology. The oscillating head with orbital circular motion adapts to all surfaces. In combination with the ARCORA® PU-PAD it will be achieved an excellent cleaning result. The combination of orbital and rotating motions creates a constantly vibration, which increases the cleaning efficiency and ensure a completed covering on the surfaces.

The ARCORA® PU-PAD is also particularly suitable for use with eccentric machines.

To ensure that the PU-PAD withstands the vibrations and pressure of orbital and eccentric machines, the pads are equipped with a special pad back.

PU PAD with velcro back to withstand the pressure and vibration.

WHY ARCORA® PU-PAD?

Light

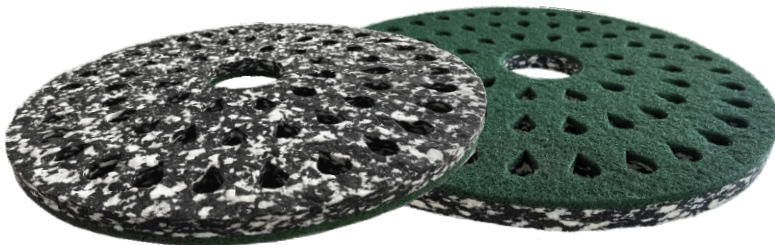

The 100 % environmentally friendly pad with waterdrop system (water drop perforation) is the ideal pad for maintenance cleaning, **especially with smaller scrubber drier machines.**

The ARCORA® PU-PAD Light...

- enables an area performance for maintenance cleaning of up to **80.000 m².**
- is perfect for **smaller scrubber drier machines.**
- has a special **robustness and durability** due to the composition of polyester, polyether and a fixation of polyurethane.
- is applicable on all types of water resistant elastic and hard floor coverings, even on porcelain stoneware floors and safety floors up to R13.
- has a **higher water absorption** than conventional pads.
- is **100% environmentally friendly** due to the exclusive use of recycled products.

fleece pad back

velcro pad back

The ARCORA® PU-PAD Light...

- ensures a lower pressure specially on **small-battery scrubber-drier machines** with lower Ah battery, e.g. 56 Ah, and enables longer running time.
- supports the running time of lithium batteries.
- reduces the pressure on motors and batteries which enables a higher m² performance.
- leads to a lower pressure on small cable scrubber-drier motors.

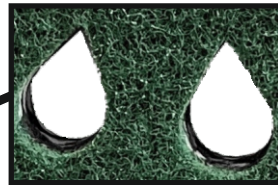

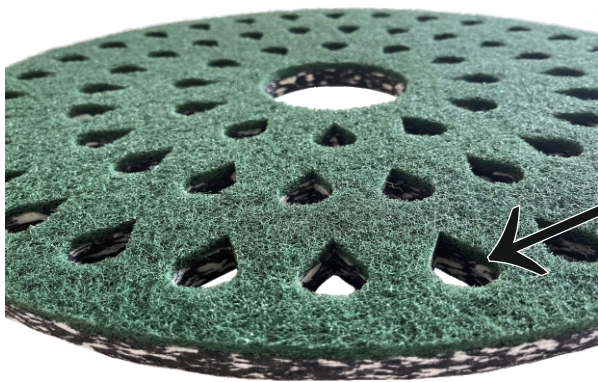

ARCORA® PU-PAD *Light*

innovative development extension of ARCORA® PU-PAD

What makes the ARCORA® PU-PAD Light special?

- Due to the applied water drop perforation, the mechanic is additionally supported by the plus/minus effect without damaging the floor → Gentle cleaning
- The perforation technique enables better water distribution and dirt absorption
- To protect the environment, the water drop system enables to reduce the amount of water by the application
- Gliding the machine over the floor is much easier with the PU PAD Light due to the die-cutting technology

Waterdrop System

PLUS-MINUS effect

- Better glide on the floor & better dirt absorption
- Better water distribution & water saving

Application / Application areas

For maintenance cleaning of all floor coverings, e.g. tiles, stone floors, porcelain stoneware, concrete floors up to vinyl floors, PVC, linoleum. **Perfect suitable for use with smaller scrubber-drier machines.** The pad side is used for cleaning all resilient coverings and hard floors. For more stubborn dirt, the pad can be turned over and the pad back (green) can be used like a normal cleaning pad.

100 % environmentally friendly

The ARCORA® PU-PAD Light is 100% environmentally friendly, due to the use of recycled products. Furthermore, the pad is certified as climate neutral product. The produced CO2 amount is compensated by international climate protection projects which support the decrease of global warming.

TOWARDS A SUSTAINABLE AND ENVIRONMENT FRIENDLY WORLD
