Minimum requirements
for effective quality
management
in the company

Basis for environmental
management
systems: For
continuous
improvement of
environmental
performance

Corporate responsibility
for the impact of
activities towards the
environment & society

Traceability of recycled
raw materials within a
supply chain

CO2 emissions
are offset by climate
protection projects
offset

Climate neutrality

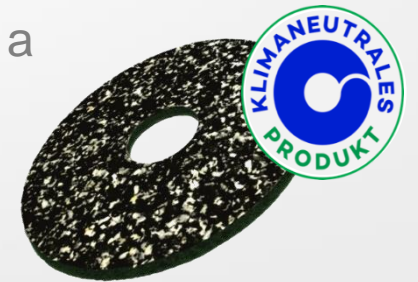

Definition:

Climate neutrality means creating a balance between emissions and emissions and their absorption from the atmosphere.

The CO2 emissions caused by the individual processes are offset by certified CO2 compensation certificates or saved before they are generated through our numerous recycling processes.
before they are produced.

Since May 2021, ARCORA® International GmbH has been a has been a climate-neutral company.

ARCORA® products are also certified as climate neutral.

PU-PAD systems

The ideal solution for your maintenance cleaning:
Only one pad in one colour!

- Area output of up to 50,000 m²
- 100 % environmentally friendly
- Can be used on all water-resistant elastic floors and hard floor coverings, as well as on safety floors up to R13
- Suitable for all single disc, scrubbing, orbital and eccentric machines
- Extremely robust and durable
- No long introductions necessary

Cleaning and polishing pads

Product assortment

PU-PAD Light

- Area performance for maintenance cleaning of up to 80,000m²
- 100% environmentally friendly through the exclusive use of recycled products
- Suitable for smaller scrubber driers
- Has higher water absorption than conventional pads
- Universally applicable
- Due to the applied water drop perforation, the mechanic is additionally supported by the plus/minus effect without damaging the floor → Gentle cleaning
- The water drop perforation enables better water distribution and dirt absorption
- PLUS-MINUS effect, → Better glide on the floor & Better dirt pick-up, Better water distribution/saving.
- Relieves the load on motors, accumulators and batteries and achieves a higher m² output without burdening the brush motor
