METAL SALT-FREE LONG-TERM COATING

PROPERTIES

Applicable on water-resistant, coatable floor coverings such as PVC, rubber, linoleum, absorbent natural and artificial stone. Also suitable for protecting the sealants of wood and cork floors. Ideal for dry film renovation and high-speed applications. It has good filling capacity, excellent chemical resistance, and **meets slip resistance requirements**.

APPLICATION AREA

Suitable for all water-resistant hard floor coverings. Do not apply to unsealed wood and cork floors.

APPLICATION

Thoroughly remove dirt and old coatings. Then neutralize the floor and rinse thoroughly with clear water. Allow the floor to dry completely. Apply the coating thinly and evenly with a coating mop. Depending on the absorbency of the surface, apply 2-3 coats at intervals of approx. 30 minutes. Consumption: 40-60 ml/m²

Tip: For very old linoleum floors, it is recommended to treat the floor with a single-disc machine and a pad (white or red) after the first coat has dried. Then apply the next coats.

Spray-Cleanern:

Dilute product 1:1 with cold water. Apply with a spray bottle and polishing machine. Consumption: 1.0 ml/m².

Coating:

Carry out only 1 application. Consumption: 25.0 ml/m² per application.

Polishing:

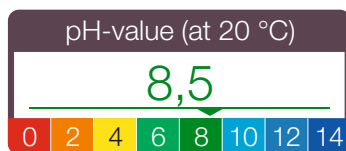

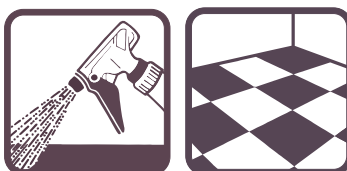

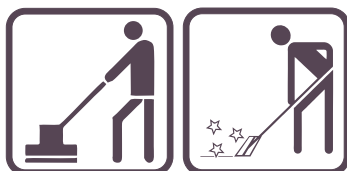

Occasional polishing compacts the maintenance components and removes traffic marks and increases durability.

REGULATION (EC) No 1272/2008: The product is not classified under the CLP Regulation.

Ecology: The surfactants used are biodegradable in accordance with the law on environmental compatibility of detergents and cleaning agents and even exceed these requirements. **Free from metal salts.**

INGREDIENTS

< 5 % anionic surfactants, phosphates, fragrances, 1,2-benzisothiazol-3(2H)-one, pyriithione, Na salt, 5-chloro-2-methyl-2H-isothiazol-3, methylisothiazolinone
