

## HI-PRO AGRESOR

FOR THE REMOVAL OF BUILT-UP CARE FILMS

### FEATURES

The **HI-PRO AGRESOR** Pad is less aggressive than conventional sanding pads, but has at the same time an open structure and is therefore particularly suitable for removing and ablating built-up care films on insensitive surfaces. This pad is also suitable for removing stubborn and metal-crosslinked coatings.

- High sanding efficiency
- Less aggressive than conventional pads

### APPLICATION

In combination with a single disc machine.

### APPLICATION AREA

Suitable for the deep cleaning of elastic coverings, stone floors and porcelain stoneware.
