SIZE-ADJUSTABLE FOLDING HOLDER FOR PROFESSIONAL CLEANING

Stepless adjustment
from 37,5 to 50 cm

SPECIFICATIONS

Colour: BLACK
Size: 37,5-50 cm individually adjustable
Unit: 5 pcs
Art.-No.: FMH3850

THE PROBLEM SOLVER FOR SHRUNKEN MOP COVERS

The **size-adjustable FLEX-ON** mop holder, made from **recycled materials**, is an innovative solution for professional cleaning. It adapts flexibly to all standard mop covers and can be adjusted continuously **from 37,5 to 50 cm**. This means that mop covers that have shrunk due to washing, drying or production deviations can still be used, significantly reducing waste and material costs.

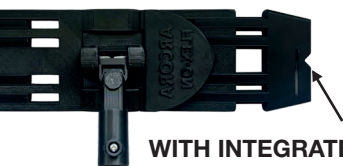

- Replaces several holder sizes (40 and 50 cm)
- Stepless adjustment with stainless steel screws
- Compatible with all standard mop covers and handles/telescopic handles
- Made from recycled materials (**ECOBLOCK TECHNOLOGY**)
→ durable plastic
- Minimises storage space, costs and waste
- Shrunk mop covers no longer need to be sorted and disposed of
- With integrated adapter as anti-theft protection to prevent loss

APPLICATION

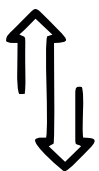

The **FLEX-ON** mop holder can be easily adjusted using two stainless steel screws. It is no longer necessary to change the holder for different mop covers. The V-shaped spreader ensures that the holder can be easily inserted into the pockets.

APPLICATION AREA

The **FLEX-ON** mop holder is the ideal solution for daily cleaning. Whether in building cleaning, healthcare or public facilities, it impresses with its genuine added value.

WITH INTEGRATED ADAPTER:
Customised production
as anti-theft protection

Size adjustable 37,5-50 cm
Replaces multiple holder sizes

Universally compatible
For all standard
mop covers and handles

Sustainable
Made from recycled,
durable plastic

Cost and waste savings
Shrunk mop covers
can still be used

Space saving
One holder for all
mop covers

Cradle-to-Cradle-concept: In future we plan to introduce a cradle-to-cradle concept in combination with a deposit system. The aim is to enable the return of the mop holder so that the plastic parts it contains can be reused. This closes the material cycle and makes a further contribution to resource conservation and sustainable product use. The deposit system we use when selling the mop holder creates an incentive for our customers to return the mop holder after use in order to get their deposit back.

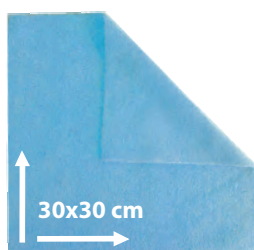

IN-BOX & ON-ROLL

MICROFIBER CLOTH

ARCORA®

THE NEW GENERATION CLEANING SPONGE

35 D. **LOGLIFE**
Sponge polyester content
scratch-free application

SPECIFICATIONS

Colour:	BLUE-ORANGE, GREEN-ORANGE, YELLOW-ORANGE, PINK-ORANGE
Size:	150 x 70 x 45 mm
Weight:	approx. 12 g/Sponge
Unit:	10 x 10= 100 pcs
Art.-No.:	LLS15070BLO  LLS15070GRO  LLS15070GEO  LLS15070ROO 

**DURABLE -
SCRATCH-FREE-
MULTI-TALENTED!**

The new generation cleaning sponge, the **LOGLIFE SPONGE**, is multifunctional removing stubborn dirt with ease. The tougher, more durable **LOGLIFE** orange side can be used to clean any surface without scratching it. Thanks to the **LOGLIFE** polyester content with its strong, closed structure, the tougher orange side has **very good surface resistance** and is resilient to all types of abrasion and bits do not break off. Compared to other conventional felted ARCORA® sponges, the **LOGLIFE** sponge is significantly **more durable**. An environmentally friendly, high-quality and efficient all-rounder that can replace other ARCORA® sponges with different fleece sides.

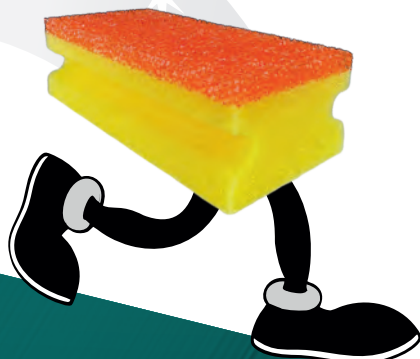

- **Scratch-free on any surface**
- **Versatile: No need to use different sponges**
- **Excellent dirt-removing power thanks to the LONGLIFE orange side**
- **High dirt and water absorption**
- **Antibacterial properties**
- **Durable & robust**
- **With grip to protect hands and fingernails**

APPLICATION

For damp and wet cleaning of all surfaces, e.g. pots, pans, metal containers, tiles, stainless steel surfaces and even glass or mirrors. Thanks to the closed cell structure, the **LOGLIFE** side does not absorb dirt or oil and can be easily cleaned with water.

APPLICATION AREA

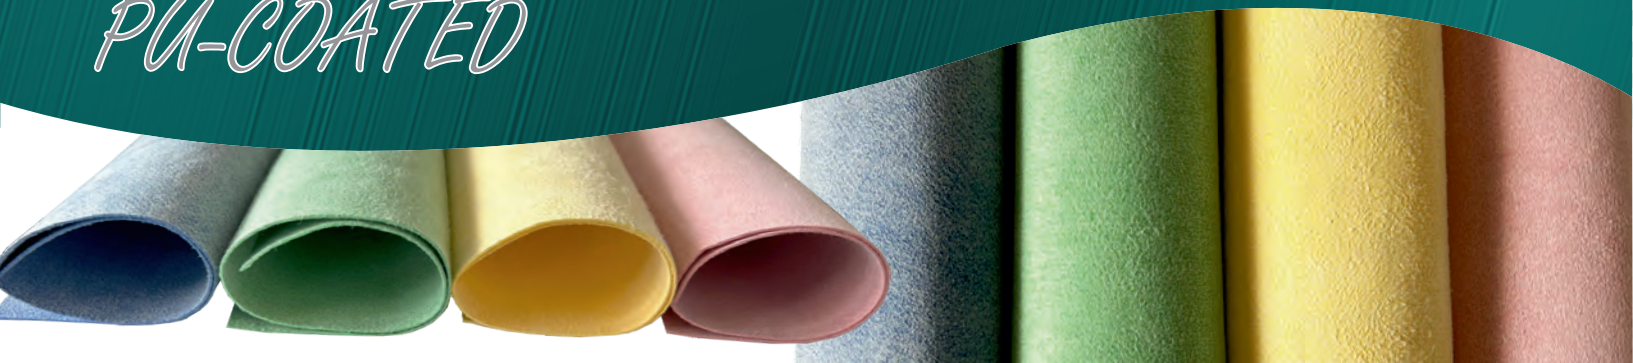

Particularly suitable for use in facilities such as hotels, restaurants, pubs, catering and party services as well as in office buildings, airports, shopping centers and clinics.

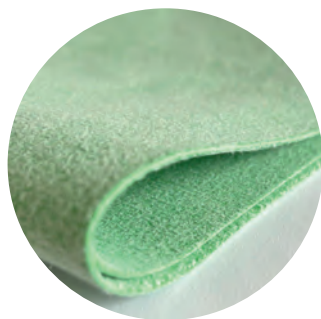

POWER-LINE

PU-COATED

ARCORA®
GERMANY

PU-COATED MICROFIBRE CLOTH - STRONG AND DURABLE

SPECIFICATIONS

Yarn mixture:	70% Polyamide 30% Polyurethane
Colour:	BLUE, GREEN, YELLOW, PINK
Pictograms:	Office, Kitchen, Bathroom, Toilet
Size:	35x40 cm
Weight:	37 g /cloth (260 GSM)
Water absorption:	> 250 %
Washing cycles:	Up to 1000 washes at 60 °C
Unit:	20 x 5 = 100 pcs
Art.-No.:	PL3540BL ● PL3540GR ● PL3540GE ● PL3540RO ●

Powerful cloth for excellent cleaning results

The **POWER-LINE PU-coated microfibre cloth** offers an outstanding solution for anyone looking for a highly absorbent and durable cleaning cloth. It is extremely absorbent with outstanding cleaning performance. The PU content ensures the excellent absorbent qualities, while the polyamide ensures optimum dirt absorption. These two material components ensure that dirt particles are not only absorbed well but can also be washed out effortlessly with less residue remaining on the **POWER-LINE PU-coated microfibre cloth** than other conventional cloths. When damp, it has a **leather-like** feel.

- **Highly absorbent with excellent dirt removal**
- **Special material structure for improved and smoother cleaning**
- **Scratch-free and streak-free cleaning on all surfaces**
- **Optimum dirt release during rinsing**

APPLICATION

Dip the POWER-LINE PU-coated cloth in water, wring it out and apply it to the surface to be cleaned. The surface is clean and dry in just one pass - without streaks and without drying.

APPLICATION AREA

For cleaning all surfaces such as stainless steel, glass, chrome fittings, painted surfaces or office furniture. Particularly suitable for use in public facilities, hospitals, retirement and nursing homes, airports, shopping centers, hotels, restaurants, pubs and office buildings. Thanks to its durability, the POWER-LINE PU-coated cloth is particularly recommended for rental processes in industrial laundries.

WASHING RECOMMENDATIONS

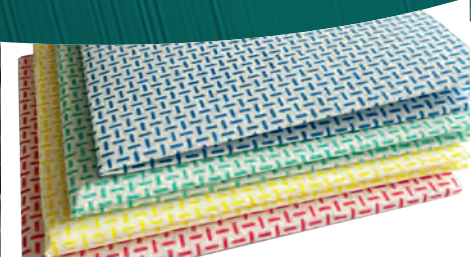

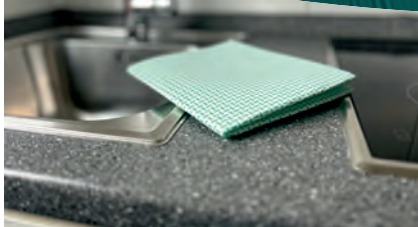

A washing temperature of 60 °C is recommended. A maximum washing temperature of 95 °C should not be exceeded. The use of fabric softener and bleaching agents should be avoided. It is generally recommended that the product should only be washed in its pure form. **After repeated washing, the gliding properties of the cloth will improve.**

"Sustainability starts with durability"
the longer a product lasts,
the smaller its ecological footprint.

POLIERMEISTER

ARCORA®
GERMANY

LINEN POLISHING CLOTH

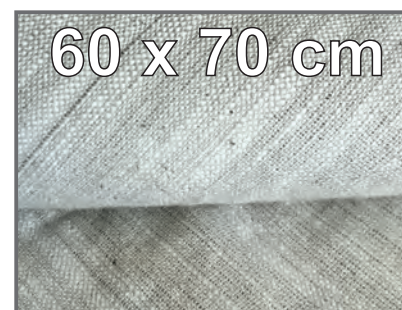

FOR A CLEAR VIEW WITH NATURAL POWER

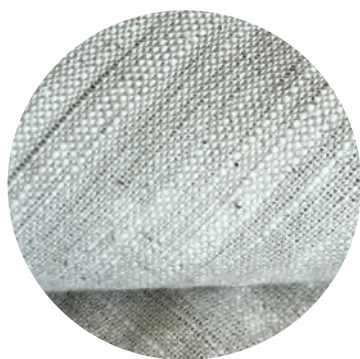

SPECIFICATIONS

Fiber mixture:	100% Linen
Colour:	NATURAL
Size:	60x70 cm
Weight:	110 g /cloth (260 g/m²)
Unit:	10 x 10 = 100 pcs
Art-No.:	PLN6070

Recommended by experts for professional window cleaning!

The **POLIERMEISTER LINEN POLISHING CLOTH** is your go-to solution for a flawless and brilliant shine on glass surfaces. With its generous size of 60 × 70 cm and finely woven linen structure, it delivers streak-free polishing with zero lint. Whether it's shop windows, glass doors, mirrors, or windowpanes: This cloth offers excellent absorbency, a comfortable grip, and long-lasting durability – perfect for daily use in professional cleaning environments. Made from hard-wearing linen, which is known for its long service life and high cleaning performance.

- Linen polishing cloth
- Ideal for polishing and spot cleaning
- Extremely absorbent & durable
- Large format: ideal for wide surfaces
- High-quality linen: lint-free & streak-free
- Not suitable for dryer

Do not use fabric softener or bleach
Wash according to type

APPLICATION

For polishing or cleaning glass surfaces. Also suitable for cleaning window frames and other sensitive surfaces.

APPLICATION AREA

Thanks to the rougher surface in combined with the linen's ability to absorb a lot of moisture, it is perfect for drying and polishing smooth, shiny glass surfaces such as mirrors windows or frame surfaces. Not suitable for sensitive painted surfaces. Ideal for use in offices, restaurants, hotels, public facilities, shopping centres, etc.
The LINEN POLISHING CLOTH is used by professional window cleaners.

WASHING RECOMMENDATIONS

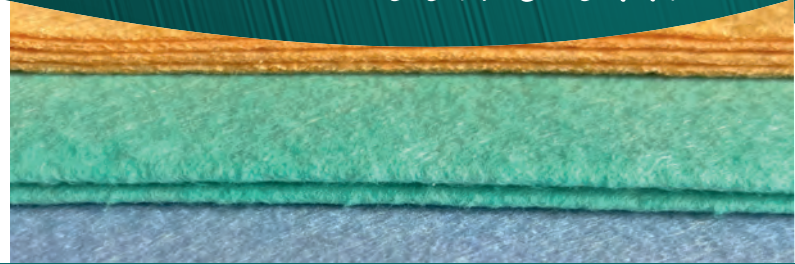

A washing temperature of 60 °C is recommended. The use of fabric softener and bleaching agents should be avoided. It is generally recommended that the product should only be washed in its pure form. Not suitable for dryer!

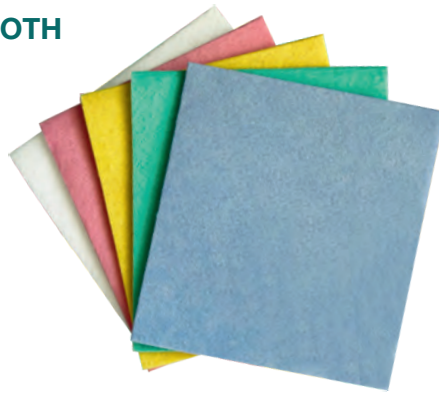

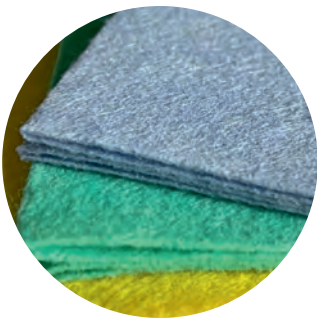

**STANDARD
100**

The label identifies textiles that have undergone comprehensive testing for harmful substances. It guarantees a high level of product safety, from the fibre to the finished end product. Every item with this label has successfully passed independent laboratory tests for harmful substances.

NON-WOVEN CLOTHS - POWERFUL CLEANING, VERSATILE USE

NON-WOVEN GENERAL PURPOSE CLOTH

SPECIFICATIONS

Yarn mixture: Viscose, Polyester, Polypropylene
Colour: BLUE, GREEN, YELLOW, PINK, WHITE
Cloth size: 36x40 cm
Weight: 110 g/m²

Unit: 20 x 10 = 200 pcs

Art.- No.: VA3640BL110 ●

ProPAD 3IN1

ADDED VALUE THROUGH INNOVATION – ARCORA® DIAMOND CLEAN TECHNOLOGY

In times of so much brand diversity, one thing counts above all: creating added value, with convincing solutions. With the innovative **Diamond Clean Technology** ARCORA® offers a complete solution for cleaning, care and polishing of all floor types when used with scrubber-dryer machines and ultra-high-speed machines.

Since 1992, ARCORA® has been developing modern floor care systems.

Our **Diamond Clean Technology** cleans and polishes floors in one step, without any chemical additives.

Made from 100% recycled polyester and natural hair

THREE FUNCTIONS, ONE PAD – MAXIMUM EFFICIENCY

Unlike conventional floor pads which only clean, the **SUNSHINE ProPAD 3IN1** delivers brilliant results without any additional steps. It is ideal for efficient and thorough maintenance cleaning with impressive sustainable performance. With the **ARCORA® SUNSHINE ProPAD 3IN1** you can effortlessly clean up to **65,000 m²** of floor space – efficiently, sustainably and reliably.

- ✓ **Multiple steps combined in one pad: cleaning, polishing and ultra-high-speed polishing 3IN1**
Fast, efficient workflow. Only one pad instead of three.
- ✓ **Cleaning and polishing in one step**
For coated and uncoated floors, scrubber-dryers with **150-600 rpm**
- ✓ **Ultra-high-speed polishing**
High-speed polishing with machines from **1500 to 3000 rpm**
- ✓ **4-6 times longer lasting and up to 80% cost savings**
Lower consumables, less storage space and labour required
- ✓ **Environmentally friendly cleaning without chemicals – ONLY WITH WATER**
Works exclusively with water. Safe on users and floors.
- ✓ **Brilliant results**
Visible after the very first application.

SPP330GU	13"/330 mm	SPP508GU	20"/508 mm

Packaging unit: 5 pieces per box

APPLICATION

The **ARCORA® SUNSHINE ProPAD 3IN1** cleans and polishes coated and uncoated floors particularly effectively. Thanks to its unique 12,000 grit, coated surfaces are treated optimally. For best results, we recommend cleaning and polishing with water or dry polishing with ultra-high-speed polishing machines. The pad is versatile and works with scrubber-dryers, single-disc machines (**150–600 rpm**), ultra-high-speed polishing machines (**from UHS 1500 to UHS 3000 rpm**) as well as oscillating and orbital machines or scrubbing robots. Special sizes are available on request.

APPLICATION AREA

Ideal for use in commercial, industrial and public areas such as shopping malls, supermarkets and airports. Suitable for coated and uncoated floors, such as concrete, natural stone, terrazzo, marble, granite, PVC and ceramic.

ARCORA® SUNSHINE ProPAD 3IN1

Area performance up to
65,000 m²
Grain size 12,000

Environmentally friendly cleaning without chemicals – ONLY WITH WATER

MORE SHINE WITH LESS EFFORT!

RENOVATING, POLISHING AND CLEANING MARBLE FLOORS

The **ARCORA®SUNSHINE MARBLE PAD** is the ideal solution for renovating, cleaning and high-gloss polishing marble, natural and artificial stone floors and is only suitable for wet use. The pad can be used to achieve a brilliant wet look on floors **without orange peel**. Up to 1,200 m² of floor space can be treated efficiently, sustainably and comfortably. Due to its high performance and outstanding polishing results, it is the preferred choice of leading stone floor restoration companies.

Available in 17"/432 mm with the following grain sizes:

1+ = 200 K, 1 = 400 K, 2 = 800 K, 3 = 1500 K, 4 = 3000 K, 5 = 5000 K

Packaging unit: 5 pieces per grain size in carton

On request, the pads can be custom-made in diameters ranging from 9 to 22 inches.

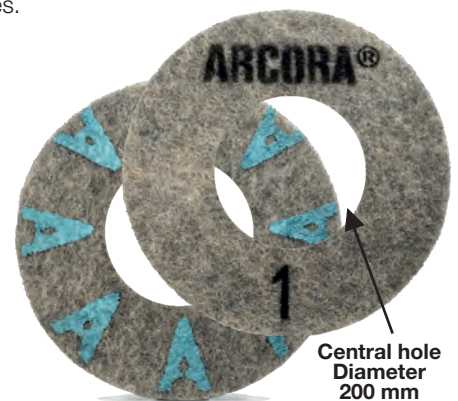

APPLICATION/APPLICATION AREA

The **ARCORA®SUNSHINE MARBLE PAD** is ideal for refurbishing, cleaning and polishing all marble, natural and artificial stone floors. It is used with a heavy-duty single-disc machine (150–400 rpm) and ensures perfect results. **Routine cleaning/simple maintenance:** After intensive cleaning, maintenance cleaning can be carried out daily with the ARCORA® SUNSHINE ProPAD 3IN1 with 12,000 grit.

Made from
100% recycled
polyester and natural hair

ARCORA® SUNSHINE MARBLE PAD

RESTORING, POLISHING AND MAINTAINING GRANITE FLOORS

The **ARCORA®SUNSHINE GRANITE PAD** is ideal for restoring, polishing and maintaining granite and concrete floors. The pad can be used to gently restore and maintain up to 300 m² of granite flooring. Leaves a high-gloss surface without orange peel.

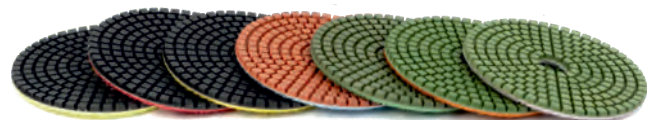

Available in 4"/100 mm with the following grain sizes:

50 K, 100 K, 200 K, 400 K, 800 K, 1500 K, 3000 K

Packaging unit: 10 pieces per grain size in carton

APPLICATION/APPLICATION AREA

The **ARCORA®SUNSHINE GRANITE PAD** is the ideal solution for restoring, polishing and maintaining granite and concrete floors. It can be used with both heavy-duty single-disc machines with FEMALE VELCRO (150–400 rpm) and scrubber-dryers with MALE VELCRO, ensuring a consistently flawless result. Five to six granite pads can be attached to the machine per system. After intensive cleaning, maintenance cleaning can be carried out daily with the ARCORA® SUNSHINE ProPAD 3IN1 with 12,000 grit.

FEMALE VELCRO

For use with single-disc machines
in combination with pad plates

For use with scrubber-dryers
in combination with Superpad

PRO-ABRASIVE *PAD-TECHNOLOGY*

★ ★ ★ ★ ★
WORLD
PREMIERE

ARCORA®
GERMANY

3D MULTI-FIBRE ABRASIVE TECHNOLOGY

The PRO-ABRASIVE PAD SYSTEM with 3D multi-fibre abrasive technology achieves excellent cleaning and polishing results on numerous waterproof surfaces, without any cleaning agents, using **only water**.

- ✓ **Universally applicable:** Suitable for all waterproof floor coverings.
- ✓ **Optimal surface quality thanks to 3D abrasive technology:** Improves the floor structure and enables an even, high-gloss finish.
- ✓ **Sustainable:** The cradle-to-cradle concept promotes the complete recycling of products.
- ✓ **Effective cleaning:** No chemicals required, just water. 'For the sake of the environment'

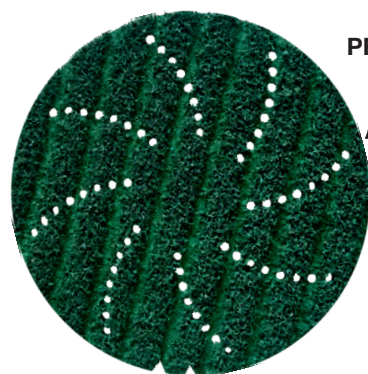

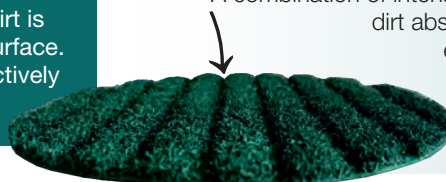

*COMING
SOON

Patented 3D multi-fibre abrasive technology:

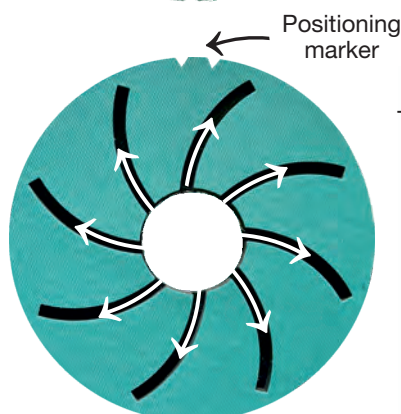

The rotating movement of the pads creates an electrostatic effect through mechanical friction in combination with the fibre-mineral structure. This effect pulls dirt out of the pores and ensures that even stubborn dirt is thoroughly removed without aggressive chemicals or damage to the surface. This principle is known as encapsulation technology, as the dirt is effectively absorbed and enclosed.

PLUS-MINUS-EFFECT

For improved cleaning contact with the floor. A combination of intensive cleaning power and dirt absorption for a particularly efficient and even result.

PRO-ABRASIVE PAD with
Octopus Technology

Positioning
marker

Cleaning with water – naturally effective!

For best results, the pads should only be used with water. Chemical cleaning agents can impair the mechanical effect of the pads, as soap-based substances can reduce the adhesion of the pad to the surface. Cleaning with water ensures streak-free floors and prevents the formation of microfilms that could promote bacterial growth.

Best results are achieved with the carrier pad:

Carrier pad with Octopus technology:

The carrier pad is inserted between the pad plate and PRO-ABRASIVE PAD and is compatible with all standard floor cleaning devices. The vortex-driven water flow distributes the liquid particularly efficiently and, thanks to centrifugal force, actively rinses dirt out of the pad.

The result: higher cleaning performance, extended pad life and efficient water consumption with even distribution ensure more environmentally friendly cleaning.

The carrier pad

***COMING**

SOON

The patented 3D multi-fibre abrasive technology has been under intensive development for a year and a half now. During its design and implementation, particular emphasis was placed on two key aspects: firstly, the durability of the products, in order to guarantee users high efficiency and reliability. Secondly, a strong focus was placed on environmentally friendly and resource-saving manufacturing so that production meets the highest standards not only technically but also ecologically.

***COMING SOON:** Our pads are manufactured according to the latest industrial standards and are based on the highest current quality guidelines to ensure a product of outstanding precision and reliability. As this is a genuine world first, being launched on the international market for the first time, we are now in the final phase of production. Development has been completed, testing has been successfully carried out, and manufacturing is nearing its successful conclusion.

Our aim is to bring the pads to market as quickly as possible and make them available to customers worldwide. We are convinced that this innovative product will set new standards and look forward to officially launching it shortly.

Sizes: We will offer the pads in various standard sizes and also have the option of customising the sizes to meet the specific requirements of our customers.

Please note: These pads are not suitable for use with orbital or eccentric technology. They are particularly recommended for use with scrubber-dryers and single-disc machines, as they ensure optimal performance and durability in these applications.

SCRUBBER DRYER- AND SINGLE DISC MACHINE

ARCORA®
GERMANY

380BM/25L SCRUBBER DRYER MACHINE

The walk-behind scrubber dryer machine is ideal for for the daily maintenance cleaning of smaller floor surfaces, especially in hard-to-reach areas and confined spaces. With its user-friendly control panel and compact structure, it ensures ease of use.

- **Easy to use and transport**
- **Excellent mobility**
- **Robust and compact design**
- **Simple brush and pad holder change**
- **Including charger, batteries, pad holder, scrubbing brush**

APPLICATION AREA

Perfect for restaurants, canteens, sanitary facilities and small shops.

Art.-No.: EX500SET
Unit: 1 Set

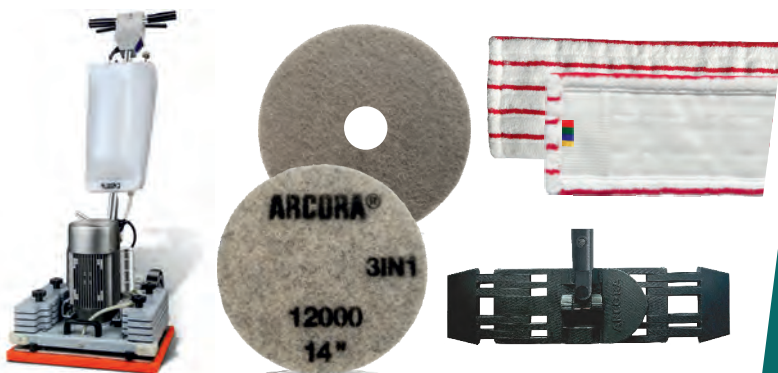

TECHNICAL DATA

Rated voltage	220V-50Hz/60Hz
Power	1500 W
Current	9.1 A
Speed of rotation	2834 rpm
Operating capacitor	30 uF/500V
Start capacitor	150 uF/300V
Noise level	<75 dB
Cable length	12 m
Base disc size	480 x 330 mm
Machine with extra weights	43+24= 67 kg
Handle packing size	420 x 100 x 1115 mm
Main body packing size	485 x 500 x 395 mm
