For a flawless, streak-free finish!

The DISH-SHINE microfiber kitchen towel is a high-performance solution for efficient drying and polishing. The woven microfiber structure ensures enhanced durability and consistent performance, while providing excellent absorbency and streak-free, lint-free results on a wide range of surfaces. The soft and gentle texture makes it ideal for delicate materials, and its high-quality construction guarantees a long service life even under frequent use.

- **Woven microfiber structure for improved durability and performance**
- **Highly absorbent for fast and efficient drying**
- **Ideal for drying and polishing dishes, glassware and surfaces**
- **Streak-free and lint-free results**
- **Gentle on sensitive and delicate surfaces**
- **Durable microfiber quality with long lifespan**

APPLICATION

Use the DISH-SHINE kitchen towel dry or slightly damp for drying and polishing. Simply wipe the surface to achieve spotless and streak-free results without additional drying.

APPLICATION AREA

Suitable for use in kitchens and catering environments. Ideal for drying dishes, glassware, cutlery and kitchen surfaces. Recommended for professional use in restaurants, hotels, cafés and food service areas.

WASHING RECOMMENDATIONS

A washing temperature between 40 °C and 95 °C is recommended. Do not use fabric softener, as it may reduce absorbency. Wash separately or with similar colors. The performance of the cloth improves after repeated washing.

Do not use fabric softener or bleach
Wash according to type
