PROPERTIES

DISPOSABLE VISCOSE MOP is the ideal solution for simple, fast, and hygienic floor cleaning. Thanks to its high absorbency, the mop efficiently picks up liquids and ensures excellent cleaning results. It is easy to rinse out, comfortable to use, and ready for immediate use. As a disposable product, it is particularly suitable for areas with high hygiene requirements and helps reduce the risk of cross-contamination.

- Hygienic, fast, and cost-effective cleaning solution
- Highly absorbent and easy to rinse out
- Helps reduce the risk of cross-contamination

APPLICATION

Suitable for dry and damp cleaning on all smooth and lightly textured floor surfaces. The DISPOSABLE VISCOSE MOP provides a simple and efficient cleaning solution for a wide range of applications. It is particularly recommended for environments where hygiene regulations prohibit the repeated use of cleaning textiles.

APPLICATION AREA

The mop is particularly well suited for hygiene-sensitive environments such as healthcare and nursing facilities, ambulances, as well as the hospitality industry, retail stores, and public spaces. It delivers reliable and efficient cleaning performance in these settings. In addition, it is an excellent choice for facilities and locations that do not have their own washing machines or an established mop laundering system.
