80 cm/100 cm/130 cm: Manufactured with ties and pockets

FEATURES

The DAMP MOP offers excellent gliding properties, allowing comfortable, effortless cleaning. Its high area coverage makes it particularly suitable for the efficient cleaning of large floor areas.

- Excellent gliding properties for comfortable, low-fatigue cleaning
- High area coverage
- Can be used both dry and damp
- Suitable for coated and uncoated floor coverings
- Ideal for large areas, such as sports halls, reception areas and public buildings

APPLICATION

The DAMP MOP can be used both dry and damp. It is suitable for picking up loose dirt and dust as well as for the routine cleaning of smooth floor surfaces.

APPLICATION AREA

Suitable for the maintenance cleaning and damp mopping of smooth, coated and uncoated floor coverings. The DAMP MOP can be used on resilient flooring, PVC flooring, hard floors and tiles, among other surfaces. It is particularly suitable for professional building cleaning and for use in industrial facilities and public institutions.

WASHING RECOMMENDATION

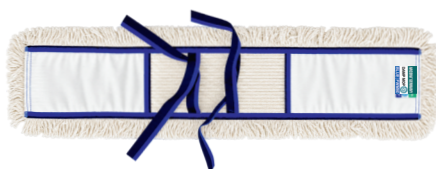

A washing temperature of 60 °C is recommended. Do not exceed the maximum washing temperature of 90 °C. Do not use fabric softener or bleach. It is generally recommended to wash only with similar products. Do not exceed a temperature of 80 °C when tumble drying.
