

ARCORA® DIAMOND STRIP TECHNOLOGY – THE NEW DIMENSION OF DEEP CLEANING

The **SUNSHINE ProPAD 200** is a high-performance solution for the thorough removal of dirt, coatings, and old maintenance films from all types of coated floor coverings. Designed for demanding cleaning tasks, this high-performance pad combines innovative materials with maximum efficiency. Thanks to its special composition of recycled fibers and high-quality polycrystalline abrasive particles, the ProPAD 200 reliably removes stubborn dirt, wax layers, floor coatings, and even deeply embedded scratches. At the same time, it prepares floors optimally for subsequent coatings or maintenance treatments.

The **ProPAD 200** enables effective deep cleaning using water alone – reducing or even eliminating the need for chemicals. This not only lowers cleaning agent costs but also saves time and labor. With an area performance of up to **6,000 m²** under optimal conditions, the ProPAD 200 delivers outstanding results when used with single-disc machines (including heavy-duty models), scrubber dryers, as well as eccentric and orbital machines.

**Made from
100 % recycled fibers**

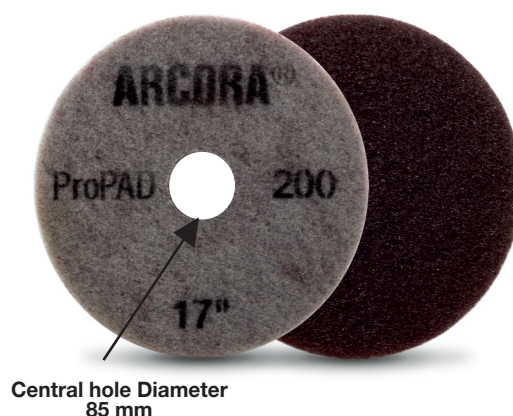

DEEP CLEANING AND INTENSIVE CLEANING AT THE HIGHEST LEVEL

- ✓ Reliably removes coatings, wax, and stubborn dirt
- ✓ Ideal for deep cleaning and floor surface preparation
- ✓ Long service life and high area coverage
- ✓ Environmentally friendly – can be used **WITH WATER ONLY**
- ✓ Reduces the use of chemicals, time, and costs
- ✓ Suitable for various machine types

APPLICATION/APPLICATION AREA

The **SUNSHINE ProPAD 200** has been specifically developed for deep cleaning and intensive floor restoration. It is ideally suited for removing stubborn dirt, old coatings, wax and maintenance films, as well as deposits on coated hard floors. Typical areas of application include commercial and industrial environments such as office buildings, shopping centers, hospitals, hotels, and production facilities—wherever maximum cleaning performance is required.

The **ProPAD 200** is perfectly suited for use with single-disc machines (including heavy-duty models), scrubber dryers, eccentric machines, and orbital machines, delivering reliable cleaning results at a recommended speed of **150–400 rpm**.

It is designed exclusively for wet use and is **NOT** suitable for use with high-speed polishing machines (burnishers) or for dry applications.
