ARCORA COPPER SYSTEM

FEATURES

Copper has a Mohs hardness of 2.5 - 3 and is therefore one of the soft metals. The fine copper threads gently remove even stubborn dirt and are therefore particularly suitable for the gentle cleaning of pots, pans, sinks, ceramic hobs, glass, stainless steel, etc. Copper is also excellently suited for removing rust from cutlery. Ideal for all shiny parts on bicycles and motorcycles and for windows as well as for all unpainted metal parts in cars.

Further features:

- Reduction of working time and personnel costs
- only water and little chemicals are needed for cleaning
- gentle cleaning of pots, pans, enamels, ceramic hobs, chrome and rust on cutlery
- also removes cement residue, lime, adhesive residues and silicones
- scratch-free applicable on glass (windows) and non-lacquered surfaces
- reusable several times, washable at 60°C

APPLICATION

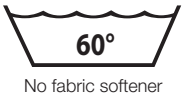

It is important that sufficient water is always used when cleaning with copper, as it does not scratch when wet. Test on an inconspicous spot before using for the first time. Do not use on Teflon or surfaces similar to Teflon.

FIELD OF APPLICATION

For maintenance cleaning of all surfaces.
Particularly suitable for use in public facilities, hospitals, old people's and nursing homes, airports, shopping centres, hotels, restaurants, restaurants and office buildings.

WASHING RECOMMENDATION

A washing temperature of 60°C is recommended. The copper products should always be washed in a washing net. The use of fabric softeners and bleaching agents should be avoided. In general, it is recommended to wash only one type of laundry.

No fabric softener
and use bleaching agents
