SCRUB & CLEAN 2IN1

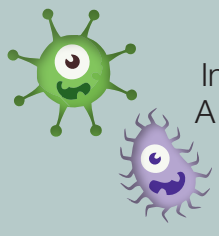

The concept of sustainability is firmly anchored in the ARCORA® corporate philosophy and plays a significant role in the development of amazing innovations. From the very beginning, sustainability has been a core concern for ARCORA® and has become increasingly importance in recent years. In all our products, we always make sure to consider not only the economic aspects but also the social and environmental aspects.

We live sustainability every day and define our approach with the guiding principle "Making a Difference for Generations." Driven by this sustainability mindset, ARCORA® develops innovations such as the SCRUB & CLEAN 2IN1 microfiber cloth.

WHY SCRUB & CLEAN 2IN1 MICROFIBER CLOTH?

Cleaning sponges are used in many areas of daily cleaning. Whether in the sanitary area, in the kitchen or in other areas of maintenance cleaning, the cleaning sponge is used in many places. Depending on use and strain, a cleaning sponge wears out over time and can no longer be used after a certain period of time. The sponges then end up in the garbage can and a new one has to be found.

In addition, the cleaning sponge develops into an object that is densely colonized with germs. A porous surface with a warm and moist climate inside makes the sponge the ideal habitat for microbes. The sponge should therefore be replaced regularly and frequently.

What if there was an alternative to the cleaning sponge?

A game changer that would produce less waste and be more hygienic?

The alternative is called SCRUB & CLEAN 2IN1 microfiber cloth!

Ideal against stubborn dirt and incrustations!

SCRUB & CLEAN 2IN1

abrasive bristle side

soft microfiber side

Do not use fabric softener & bleach
Wash according to type

PROPERTIES

The SCRUB & CLEAN 2IN1 microfiber cloth is ideal for stubborn dirt and incrustations on all non-sensitive surfaces in maintenance cleaning. The microfiber side with bristles dissolves stubborn dirt and the soft microfiber side absorbs the water and the dissolved dirt. The microfiber side is perfect for wiping and sensitive surfaces.

- With abrasive bristle side and soft microfiber side
- Scratch-free on surfaces
- Excellent dirt removal power thanks to abrasive bristle side
- High dirt and water absorption
- For thorough and streak-free cleaning

APPLICATION

The cloth achieves optimal cleaning results especially in wet/damp condition with ideal dirt removal power.

APPLICATION AREA

For basic and maintenance cleaning of any surfaces. Particularly suitable for use in kitchens and sanitary areas and for spot removal of stains.

WASHING RECOMMENDATION

A washing temperature of 60 °C is recommended. The use of fabric softener and bleach should be avoided. In general, it is recommended to wash the product only sorted by type. It is recommended to dry the SCRUB & CLEAN 2IN1 microfiber cloth gently in the microfiber program.
